

# Allistair Vilakazi

## Full-stack Web Developer

(27) 065.930.3381    allistair.vilakazi@gmail.com    alliv.dev    Bethal, Mpumalanga

### PROFILE

Self-taught full-stack web developer with a strong background in frontend development with React and Angular.

In addition, competent UI/UX design skills complement frontend skills to ensure that I can be more effective in implementing websites that follow best practices.

Recent backend skills become a full-stack developer. Have experience building multi-tenant micro-services.

Huge proponent of Agile processes within teams.

### SOFT SKILLS

### HARD SKILLS

### PASSIONS

- Travel
- Music + Piano
- Photograph

### SOCIAL MEDIA

- [github.com/simply-alliv](https://github.com/simply-alliv)

- [twitter.com/simply\\_alliv](https://twitter.com/simply_alliv)

### EDUCATION

- Curro Bankenveld, 2011 - 2015**  
IEB Matric Certificate
- University of Cape Town, 2016**  
BSc in Biochemistry and Genetics (1 year attended)

### WORK EXPERIENCE

**Freelancer, 2019** - Web Design and Development  
After 2 years of learning web development with online resources I became a freelancer for a couple of months.

**HNG Internship, 2020** - Backend Development  
I joined the HNG remote internship on the 1st of July along with approximately 11,000 other interns. I was one of the finalists of the internship along with approximately 200 other interns.

**MicroAPI, 2020** - Project Maintainer  
I am currently a core maintainer of the MicroAPI project. A new startup that stemmed from the internship. My main area of focus is to ensure that all APIs integrated with the MicroAPI system follow a standard that we have designed and that all APIs meet certain requirements:

- API automates testing and deployment for better QA.
- Code coverage of 98% or above.
- API endpoint specifications follow RESTful specifications.
- Codebase follows best practices and is well-documented to improve scalability, maintainability, and readability.
